Motion for a resolution

Paragraph 1

Motion for a resolution

1. Calls for the 2028-2034 MFF to be set at 1.27 % of EU gross national income (GNI), excluding NextGenerationEU (NGEU) repayments, to ensure the Union's capacity to achieve its political priorities and strategic objectives, as well as respond to emerging needs; considers that NGEU debt servicing, representing an additional 0.11 % of GNI, should be treated separately from funding for EU programmes within the future MFF architecture so as to ensure that available resources for these programmes remain unaffected, bringing the total to 1.38 % of EU GNI; stresses that this level is the absolute minimum to enable the Union to address major challenges, including the return of large-scale warfare in the Union's immediate neighbourhood, a highly challenging economic and social backdrop, a competitiveness gap and the worsening climate and biodiversity crises;

4b. Calls for a POSEI scheme for transport, modelled on the POSEI scheme for agriculture, to be set up to support transport in the outermost regions in order to offset the abnormally high transport costs caused by structural characteristics, which have a direct impact on the cost of living, trade between regions, and business competitiveness; stresses that a dedicated POSEI scheme for transport outside the scope of cohesion policy funds would help cut transport costs by providing mobility and connectivity and safeguarding fair access to the single market, thereby enhancing competitiveness in these regions and the EU as a whole, without disadvantaging residents in these regions,

Amendment

17a. Strongly deplores the proposed reduction in funding for the post-2027 CAP and the shift away from the policy's two-pillar structure; regrets the inclusion of the CAP in the NRPP, and stresses that this generates uncertainty as regards funding predictability for final beneficiaries; calls for a transfer of the provisions and measures relating to the agricultural policy currently included in the NRPP framework to the legal and financial framework of the CAP; takes note of the letter from the President of the Commission to the Presidents of Parliament and of the Council of 6 January 2026; regrets, however, that the proposal to increase the resources available for CAP relies mainly on voluntary flexibility mechanisms for Member States, which risk creating distortions, increasing administrative burdens and undermining predictability for farmers across different Member States; stresses that the proposed commitments should therefore be translated into real, tangible support for farmers, using the CAP distribution key for the allocation of funds; calls, therefore, for a robust, autonomous and clearly ring-fenced CAP budget in the next MFF, accompanied by stand-alone performance indicators and preserved at least at its current level in real terms, taking into account the high inflation rates recorded during the current programming period, and emphasises that the budget should be subject to annual indexation based on actual inflation rather than the application of the standard 2 % MFF deflator, in order to uphold the principle of non-regression and maintain the real purchasing power of the support granted to farmers; stresses that any reduction in Heading 1 funding would have a direct and disproportionate impact on farmers' income stability, long-term predictability, production costs, the competitiveness of the agricultural sector and the EU's food security and sovereignty: stresses that

Amendment

17b. Underlines the importance of safeguarding the integrity, commonality and two-pillar structure of the CAP, with dedicated and sufficient funding for both pillars; expresses deep concern about the attempts to renationalise or merge fundamental EU policies through the proposed NRPP regulation, which would risk undermining a level playing field for farmers, the principles of subsidiarity and partnership, the integrity of the internal market, and the EU's economic, social and territorial cohesion; recalls that preserving a common CAP, with earmarked funding supporting areas with natural constraints, contributes to the preservation of rural areas and to economic, social and territorial cohesion in line with Article 174 TFEU, particularly in territories facing permanent natural or demographic constraints and in mountainous areas; stresses that direct payments generate clear EU added value by reducing income inequality among farmers and mitigating the inflationary effect on land markets, and that these payments should continue to ensure income stability, high-quality production and protection against price volatility, while being better targeted at farmers actively engaged in agricultural production and in the provision of public goods, ensuring full financial predictability, legal certainty for CAP beneficiaries, and appropriate support for small, family and medium-sized farms; recalls that the provision of income support must remain strictly linked to the objectives of Article 39 TFEU, and rejects the application of macroeconomic conditionality to CAP payments and making such payments contingent on non-agricultural indicators, including those envisaged under the performance framework or milestones and targets set at national level; recalls, furthermore, that adequately financed sectoral programmes, particularly in the fruit and vegetable, wine and milk sectors. together with coupled

Amendment

17c. Calls for the continuation and strengthening of measures that guarantee the viability of rural areas by ensuring the full involvement of local and regional authorities in their management and providing adequate financing through a rural development fund; underlines that this fund should target both farmers and rural communities, and include on-farm and off-farm measures supporting farm modernisation, innovation, climate adaptation, generational renewal, risk management and the reduction of regional disparities, while taking into account the different agronomic, social and economic conditions and leaving no one behind; calls for instruments such as LEADER, the European Innovation Partnership for Agricultural Productivity and Sustainability (EIP-AGRI), local action groups (LAGs) and quality schemes to remain adequately financed and anchored within the CAP, while allowing synergies with other policies; emphasises that co-financing rates for these measures should be maintained at their current levels in order to ensure a level playing field across the EU; highlights the fact that proposed higher co-financing rates at national level for CAP measures, including agri-environmental and climate actions and other rural development measures, may lead to both a reduced uptake of these measures by Member States and to uneven levels of support across the EU; stresses that the idea of a generic 'rural target' with no precise set of CAP measures to be supported cannot adequately address the complex and interconnected structural challenges faced by rural areas; calls, therefore, for a minimum ring-fenced budget for rural development to be maintained at least at current levels, comprising, among other things, the EUR 48.7 billion allocated for the rural

17e. Stresses the need to support investments and practical agricultural innovation projects aimed at enhancing competitiveness and productivity, including through incentives for innovative and sustainable plant breeding, at strengthening territorial resilience and at ensuring a fair transition towards more sustainable practices in agriculture; underlines, in particular, the need to support increased digitalisation and modern, strategic infrastructure, including sustainable, modernised water infrastructure and irrigation systems, to improve crisis preparedness and climate and water resilience; emphasises, in that respect, that an adequate share of the proposed European Competitiveness Fund (ECF) should be ring-fenced for the farming sector to ensure a more effective use of the EU budget and to help make rural areas more attractive and enable new businesses to develop; underlines that it is essential for

Amendment

17f. Recalls that, pursuant to Article 349 TFEU, the EU is required to devise and implement specific policies and programmes for the outermost regions in order to address their permanent structural constraints; stresses that this obligation should be fully reflected in the 2028-2034 MFF; emphasises, in this regard, that POSEI should be maintained and strengthened as a distinct and autonomous instrument, fully funded by the EU, and be provided with stable, dedicated and predictable resources; underlines that POSEI is an essential source of income for agricultural producers in the outermost regions and remains indispensable for maintaining agricultural activity, competitiveness and diversification and for promoting economic, social and territorial cohesion, thereby providing favourable conditions for investment, job creation and the retention of people in these areas; calls, in this context, for a dedicated and ring-fenced financial allocation outside the scope of the CAP Regulation^{1a} so as to ensure the continuity of POSEI under the conditions laid down in Regulation (EU) No 228/2013^{1b}; notes, furthermore, that POSEI budgetary allocations have not been revised since 2007 and calls for them to be adjusted appropriately to reflect the cumulative impact of inflation;
